PREFACE TO THE SECOND EDITION.

THE following pages contain a Hieroglyphic Vocabulary to all the texts of the Chapters of the Theban Recension of the Book of the Dead which is printed in this Series (Vols. XXVIII—XXX), and also to most of the supplementary Chapters of the Saïte and Graeco-Roman period which are appended thereto. The whole work has been comprehensively revised, and in the case of characters to which the values given in 1897, when the first edition was compiled, are now obsolete, special care has been taken to place them in the order in which they have since been proved to belong. The arrangement of the words and their various forms is usually alphabetical, and it is hoped that the few exceptions to this rule will cause the reader no difficulty. A very considerable number of words and forms have been added to this edition, and it was necessary, for reasons of space, to omit all references.

A new feature of this edition of the Vocabulary is the Index to all the English equivalents of Egyptian words printed herein. This was prepared in answer to the requests of many who had used the first edition of the Vocabulary.

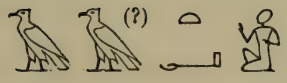

For the care which Mr. Adolf Holzhausen has given to the printing of this work my sincere thanks are due.
